1) With $P_{LC} = 0.7$

2) Only with 4 wire cable

3) The values for linearity deviation (d_{lin}), relative reversibility error (d_{hy}) and temperature effect on sensitivity (TK_C) are recommended values.
The sum of these values remain within the cumulated error limit according to OIML R60.

4) According to OIML R76

5) According to EN 60 529 (IEC 529)

Mounting and load application

The load cells are fixed at the mounting bores. For the recommended screws and tightening torques refer to the table below:

Max. capacity	Thread	Min. property class	Tightening torque ¹⁾
7.2...36 kg	M6	8.8	6 N·m
72 kg	M6	10.9	10 N·m

¹⁾ Recommended value for the stated property class. For screw dimensioning please refer to the appropriate information given by the screw manufacturers.

Load must not be applied to the side where the cable connection is located, as this would cause a force shunt.
