

*50-inch range model, dimensions may differ for other ranges

The PT420 is available with full-scale measurement ranges from 2 to 100 inches, providing a 0/4-20 mA feedback signal that is linearly proportional to the position of a traveling stainless-steel extension cable. Use the PT420 to provide position feedback on hydraulic cylinders in factories and utilities, gate position in fresh or wastewater distribution systems, or valve opening in process-related applications.

The PT420 installs in minutes by mounting its base to a fixed surface and attaching its cable to the movable object. The PT420 works without perfect parallel alignment, and when its stainless steel cable is retracted, its height is less than 5".

*Optional 3-wire, 0...20mA output signal available.

PT420

Cable Actuated Sensor Instrument Grade • 4..20mA / 0..20mA

Absolute Linear Position • Classic Stringpot Design Stroke Range Options: 0–2 to 0–100 inches Powder Painted & Anodized Aluminum Enclosure Industrial Automation & Testing Applications

General

Full Stroke Range 0-2 to 0-100 inches

Options

Output Signal 4...20 mA (2-wire) and 0...20 mA (3-wire)

Accuracy $\pm 0.15\%$ - $\pm 0.28\%$ full stroke (see ordering information)

Repeatability $\pm 0.05\%$ full stroke **Resolution** essentially infinite

Measuring Cable .019-inch dia. nylon-coated stainless steel rope

Enclosure Material powder-painted and anodized aluminum

Sensor plastic-hybrid precision potentiometer

Weight 2 lbs. max.

Electrical

Input Voltage see ordering information

Input Current 20 mA max.

Maximum Loop (loop supply voltage - 8)/0.020

Resistance (Load)

Circuit Protection 38 mA max.

Impedance 100M ohms@100 VDC, min.

 $\textbf{Signal Adjustment, Zero} \ \text{from factory set zero to } 50\% \ \text{of full stroke range}$

Signal Adjustment, to 50% of factory set span

Span

Thermal Effects, Zero 0.01% f.s./°F, max.
Thermal Effects, Span 0.01% f.s./°F, max.

Environmental

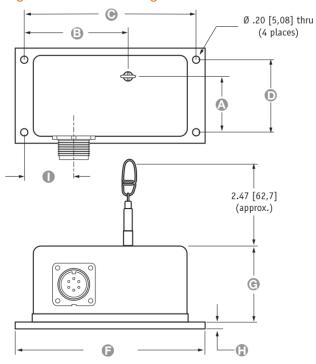

Enclosure IP50, NEMA 1

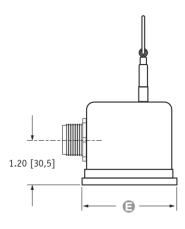

Operating Temperature -40° to 200°F (-40° to 90°C)

Vibration up to 10 g to 2000 Hz maximum

SENSOR SOLUTIONS /// PT420

Output Signal Selection

The output signal direction can be reversed at any time by simply changing the dip-switch settings found on the internal signal board. After the settings have been changed, adjustment of the Zero and Span trimpots will be required to precisely match signal values to the beginning and end points of the stroke.

To gain access to the signal board, remove the two 4-40 screws on top and lift up cover.
