

# TM201

## USB INTERFACE DEVICE FOR UTM II /UTMV

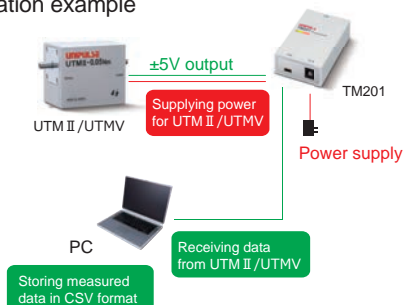

### Suitable torque meter UTM II UTMV

- Variations of torque, rotation speed, and power\* can be monitored and saved on PC. (Application software can be downloaded from our website for free)
- Maximum, minimum, and average value can be displayed.
- Measurement (numeric) data are automatically saved in CSV format.
- The unit supplies electric power to UTM II /UTMV.
- Two cables are attached: one for UTM II /UTMV and the other for PC.

$$* \text{Power (W)} = 2\pi \times \text{Torque (Nm)} \times \text{Rotation speed (rpm)} / 60$$

### Application example

### Specifications

|                          |   |
|--------------------------|---|
| UTM II Interface         | <ul style="list-style-type: none"> <li>Torque sensor input (voltage input) <ul style="list-style-type: none"> <li>Signal input range: -5 to +5V input impedance: 1M or more</li> <li>Accuracy: Non-linearity: Within 0.02%FS±1digit</li> <li>Zero drift: Within 0.2mV/°C RTI</li> <li>Gain drift: Within 0.01%/°C</li> </ul> </li> <li>Analog filter: Primary low-pass filter 1kHz (fixed)</li> <li>Digital filter: Secondary low-pass filter fc = 3, 30, 300, OFF (depending on settings)</li> <li>Data output rate: 300 times/sec.</li> <li>Resolution: 24bit Effective Resolution: Approx. 1/30000 against 5V</li> </ul> |
|                          | <ul style="list-style-type: none"> <li>Pulse input for rpm (input for open collector type) <ul style="list-style-type: none"> <li>Maximum input frequency: Compatible with the pulse output frequency of UTM II /UTMV series</li> <li>Minimum input frequency: Select from 15, 10, 5, 3, 2 rpm (when pulse rate is 4 ppr)</li> <li>Select from 60, 40, 20, 12, 8 rpm (when pulse rate is 1 ppr)</li> </ul> </li> <li>Minimum pulse width: 50µs</li> <li>Circuit layout: No-voltage (dry) contact input (minus common); open collector outputs can be connected (Ic= approx. 10mA)</li> </ul>                                |

| Accessories              | <ul style="list-style-type: none"> <li>CAB1-USB:miniUSB-computer USB cable 1.8m (same as attachment)</li> <li>CATM21-M: Cable for connecting UTM II /UTMV 2m (same as attachment)</li> <li>CATM51-M: Cable for connecting UTM II /UTMV 5m</li> <li>CN90: Waterproof plastic connector for UTM II /UTMV</li> <li>TM201 AC PIN EU: Switching AC PIN(EU)</li> </ul>  |
| CE marking certification | <ul style="list-style-type: none"> <li>EMC directives: EN61326-1</li> <li>Safety standard: EN62311</li> <li>Please specify requirement for CE marking certified product when making your order.</li> </ul>  |

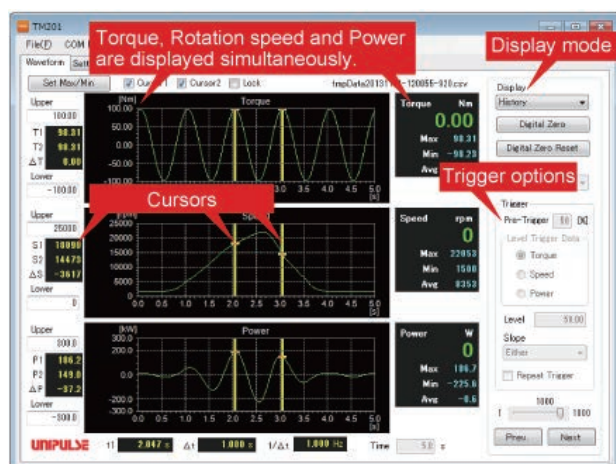

### External dimension

Unit: mm

### Application software for USB interfaces

- Supporting USB interface option for TM201, TM400, TM700, TM301, TM320, TM380, and TC80.
- Enabling real-time display of torque measured by UTM III /UTM II /UTMV, parameter settings, calibration, and data recording in CSV format. (UTM III can only use TM320, TM380 & TC80.)

### Waveform settings

Change settings of waveform display and/or data

#### ① Display mode

Normal: Waveforms currently acquired are displayed

History: Waveforms previously saved are displayed

#### ② Acquisition mode

Single: Once "Start" button is clicked, waveform data is acquired for pre-set time period.

Repeat: "Single" mode operation will repeat in cycle until "stop" button is clicked.

Hold trigger (Only with TM301, TM320 and TM700): Data is acquired when "Hold" button is clicked.

Level trigger\*: Pre-trigger (0 to 99), trigger data (torque, rotation speed, power),

Level (±99999), Trigger slope (positive, negative, either),

Repeat trigger (Standby & wait for another trigger after waveform acquisition)

\*Depending on the torque monitors, the function varies. See Help of each software.

### Cursor

Move two cursors freely, display each data value and their difference

### Zoom-in display (TM201, TM301, TM320, TM400 & TC80)

Zoom-in display at any area
