

Strand tension measurement

KCH-NA Center-hole type Compression Load Cell

Civil engineering design

The KCH-NA is a center-hole type load cell used for the management of tensile force acting on a rod or strand in various anchor methods. The diameter of its center-hole is larger than that of our conventional type KCE-NA.

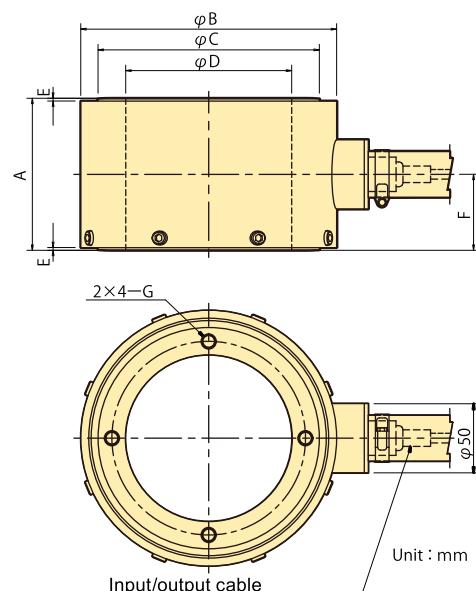

Protection ratings: IP68 equivalent

Large center-hole

Waterproof construction

(IP68 equivalent)

Small effect of eccentric load
