

## Rectangular Load Cell

\*Tensile application models are available. Inquiries are welcome.

**Load loss due to the equipment structure, etc. is small as roll loads are received directly.**

- For tension meter
- For high temperature (100°C)
- Corrosion resistance

A load cell installed below the bearings at both ends of the roller to measure the tension for controlling the tension in the metal plate.  
This can be used to control the manufacturing of paper (pulp), metal wires, various sheets, film and so on.
